

Summer 2013

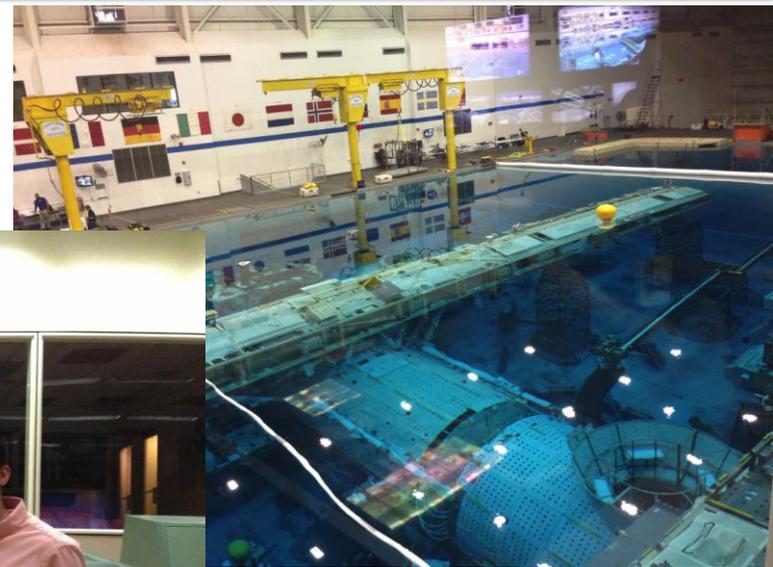

1/c Summer NASA Internship

Laura Carts and Anthony Monteforte

Tasks at JSC

- Spacewalk Data
 - We created archive of debrief comments and data to help astronauts learn from past spacewalks.
- High School Student Projects
 - HUNCH is a program that enables students to assist NASA by creating space-capable hardware.
 - We created an informational packet for the High School students as an introduction to the space station.

NASA facilities visits

Ellington Airfields (AIRSTA Houston + NASA Airfield)

- T-38 tour
- Zero-G plane tour
- Got to see a B-57 bomber (only 3 in service!)

- Got a flight with Air Station Houston
- Area Familiarization flight
- Landed on Oil Platform
- Stopped at local airfield for lunch

Recommendations for Future Interns

- Get POC information ASAP.
- Expect some changes in internship start date, especially if you're coming from a cutter.
- Clearly define housing and meal allowances with YN.
- Keep track of last year's interns, and make sure to convey lessons learned to next year's interns too.

Why This Internship Was Valuable

- Understanding of the missions and the importance of Space exploration.
- Good opportunity to incorporate ourselves in a non-military government organization.
- Great opportunity to foster professional relationships with knowledgeable and experienced NASA personnel.
